

A simple bullet journal I found online. It allows us to do some log planning for year, month, and week. It doesn't have a lot of other features though. I think this gives us a idea about what fundamental elements a blog should have.

ijbu

- Be able to assign tasks to members of the team
- Assign dates to each task
- Include tags for each task that can mark a task's level of importance (important, on hold, finished)
- Have checklist and option where you can hide completed tasks
- Progress bar that fills more and more with each completed task
- Search bar to search for tasks
- Different notes for tasks that need to get done, task that are in progress, and tasks that have been completed
- I like the idea of daily, weekly, and monthly logs

[illegible]

- to-do lists that users can use to track personal tasks and goals, and mark them as completed
- allow for scheduling (maybe something similar to Google Calendar)
- reminder notifications for tasks and events

- I think that having clean UI and avoiding too much clutter in our app is very important, as being

[illegible]

**Search engine:**  
engine a person typically  
uses to find information  
about topics or people  
often automatically a key is automatically  
typed a key to search online version of the book with information easily  
available

**Search engine:**  
used to find things that are not done, often sometimes automatically search  
results in online key to find the key was a bridge or road and  
used at the end of the road

**Key to find:**  
information, information  
online books, online online graphics

Video: <http://www.youtube.com/watch?v=Uv3v3v3v3v3>

- Includes: Daily/ing, meeting, has
  - Categories: activities, habits, items, and notes
  - Status: specific activities that should be performed
  - Any events that aren't completed are highlighted and sent into the next month
- Attached list of videos about layout guides:
- People want something fast
  - Lots of information
  - People also like personalization

Nation

- Not made for bu jo but I have seen it been used as a bullet journal
- The best feature of this is the use of shortcut of '/' to input inline objects such as calendar, tables, idea/task boards, quotes, and a lot more

Possible integration idea: Mood calendar tracking

- [Punk](#)
- Since bu jo's are mainly used on a daily basis i think it would be a good idea to integrate mood calendar as well
- Could be something simple like on each daily entry have a option at the bottom to select and email that represent how you felt that day.

**Zak's Notes:**

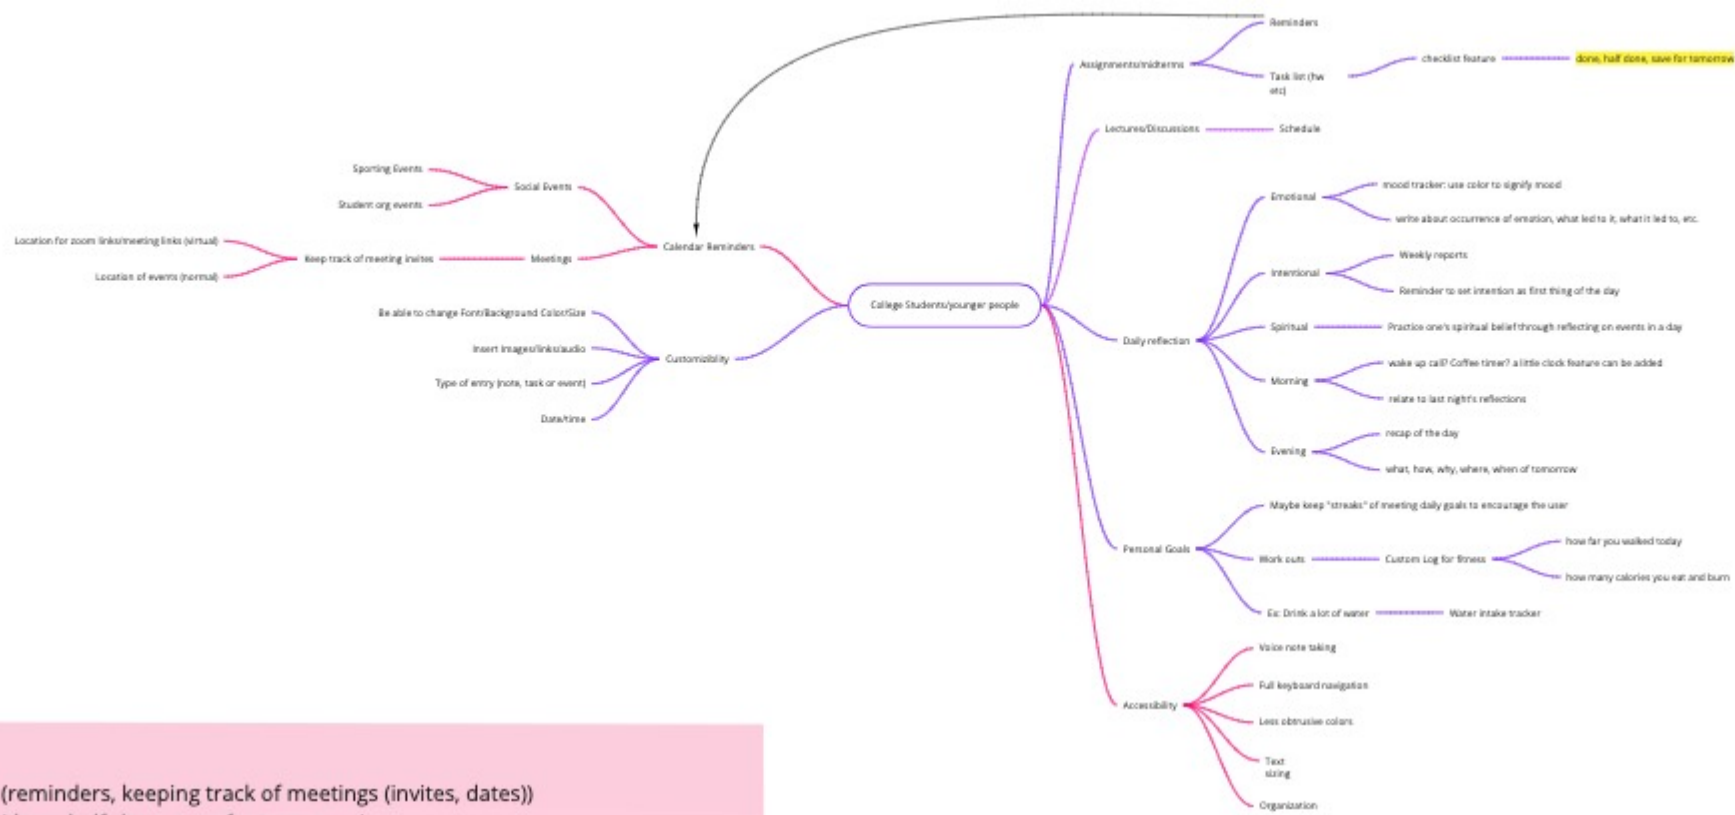

if target is for teams/groups of people:

- ways to separate entries per team member (different tabs / dropdown menus)
- Keep it more "planner" focused (helpful for team management/ splitting up tasks among team members)
- weekly entries to not clutter journal
- checklist feature

If target is for individual users:

- a mix of a journal/planner
- keeping track of daily progress
- weekly highlights

Jinhao's note  
Besides text, adding picture  
as note as well.  
Custom Logs:  
index: a link to each notes

#### Features

- calendar (reminders, keeping track of meetings (invites, dates))
- task lists (done, half-done, save for tomorrow)
- mood tracker
- weekly reports
- daily recap (self-reflection portion)
- keeping streaks of the daily goals
- custom log (track what ever they want: water, work out etc)
- accessibility (voice notes, full keyboard nav, less obtrusive colors, text sizing, organized)
- customizability ( bg/text colors, images/links/audio, type of entry, date/time)

Features

- calendar (reminders, keeping track of meetings (notes, dates))
- task lists (done, half done, save for tomorrow)
- mood tracker
- weekly reports
- daily recap (self-reflection journal)
- keeping records of the daily goals
- custom log (track what ever thing want to make, work out etc)
- accountability (voice notes, full keyboard note, text collaborative notes, text taking, organized)
- customizability (high text colors, images/texts/audio, type of entry, date/time)
- external design
- highlight regularity

## Home Page

- Index (side)
- Calendar
- Today's date (top mid)
- Username/Password (top right)
- Settings
- Rapidlogging for today
- searching with keywords
- today's log
- About us/mission statement
- Show some tutorials at the first time

## Daily Entries

- Section for notes/tasks/events
- Section for daily reflections/mood (place to log mood by colors)
- Sections for the day/month
- Text area for the daily reflection (option for voice input)
- Area for displaying reminders
- (If we're doing the water intake) then some sort of water amount tracker
- Place to log new tasks, edit or delete old ones
- Migration feature for tasks
- upload images
- tag to assign level of importance for each task (on a scale of 10)
- symbols to represent to do list or events or something else

## Goals

- Section for tasks that span longer than a day
- Format goals as a checklist

## Custom Log

- customizable log/list (ex: fitness, water)
- can include goals

Monthly Log (meant for noting down important items):

- Vertical calendar (left half) for brief logging
- Free form text area (right half) for item elaboration
- Migration feature

## Weekly Summary

Data collected from daily reflection

- tracks number of tasks done
- tracks mood throughout the week

## Future Log

- tasks/notes/events for 3-6 months in advance
- customizable by time
- Migration feature

## Calendar

- Tasks for that day
- Any reminders
- Any events/classes
